A pioneering product

When the Dutch Ministry of Environment turned to the public in 2008, seeking an alternative to outdoor gas heaters, one student in Nijmegen held the perfect solution. That ingenious student was none other than our CEO and founder, Jorg Rijkschroeff, who went on to establish Sit & Heat in 2010. His groundbreaking idea? Eco-friendly heating cushions that provide direct personal warmth, eliminating the need for gas heaters that are literally warming the planet.

Since 2008, Jorg has embarked on a mission to redefine the world of seating and heating. The first prototype came to life in 2009, and the first Sit & Heat cushions were rolled out in 2012. Jorg's inspiring journey illustrates that taking a chance on an idea can lead to significant change, especially when driven by a heartfelt commitment.

Fast forward to 2024, and Jorg, in collaboration with Jeroen Diks, leads Sit & Heat, a globally renowned company celebrated for its custom heating solutions designed to improve our lives while reducing our environmental footprint. At Sit & Heat, our unwavering dedication revolves around sustainability and innovation, principles deeply rooted in Jorg's original solution.

Sit & Heat Plaza

On the oldest shopping street in the Netherlands, you'll find 'Sit & Heat Plaza,' a vibrant hub nestled in historic Nijmegen. Food, drinks, and welcoming warmth await, where four renowned hospitality establishments have chosen us for cost-effective outdoor heating solutions that have transformed their terraces, businesses and neighbourhood for the better.

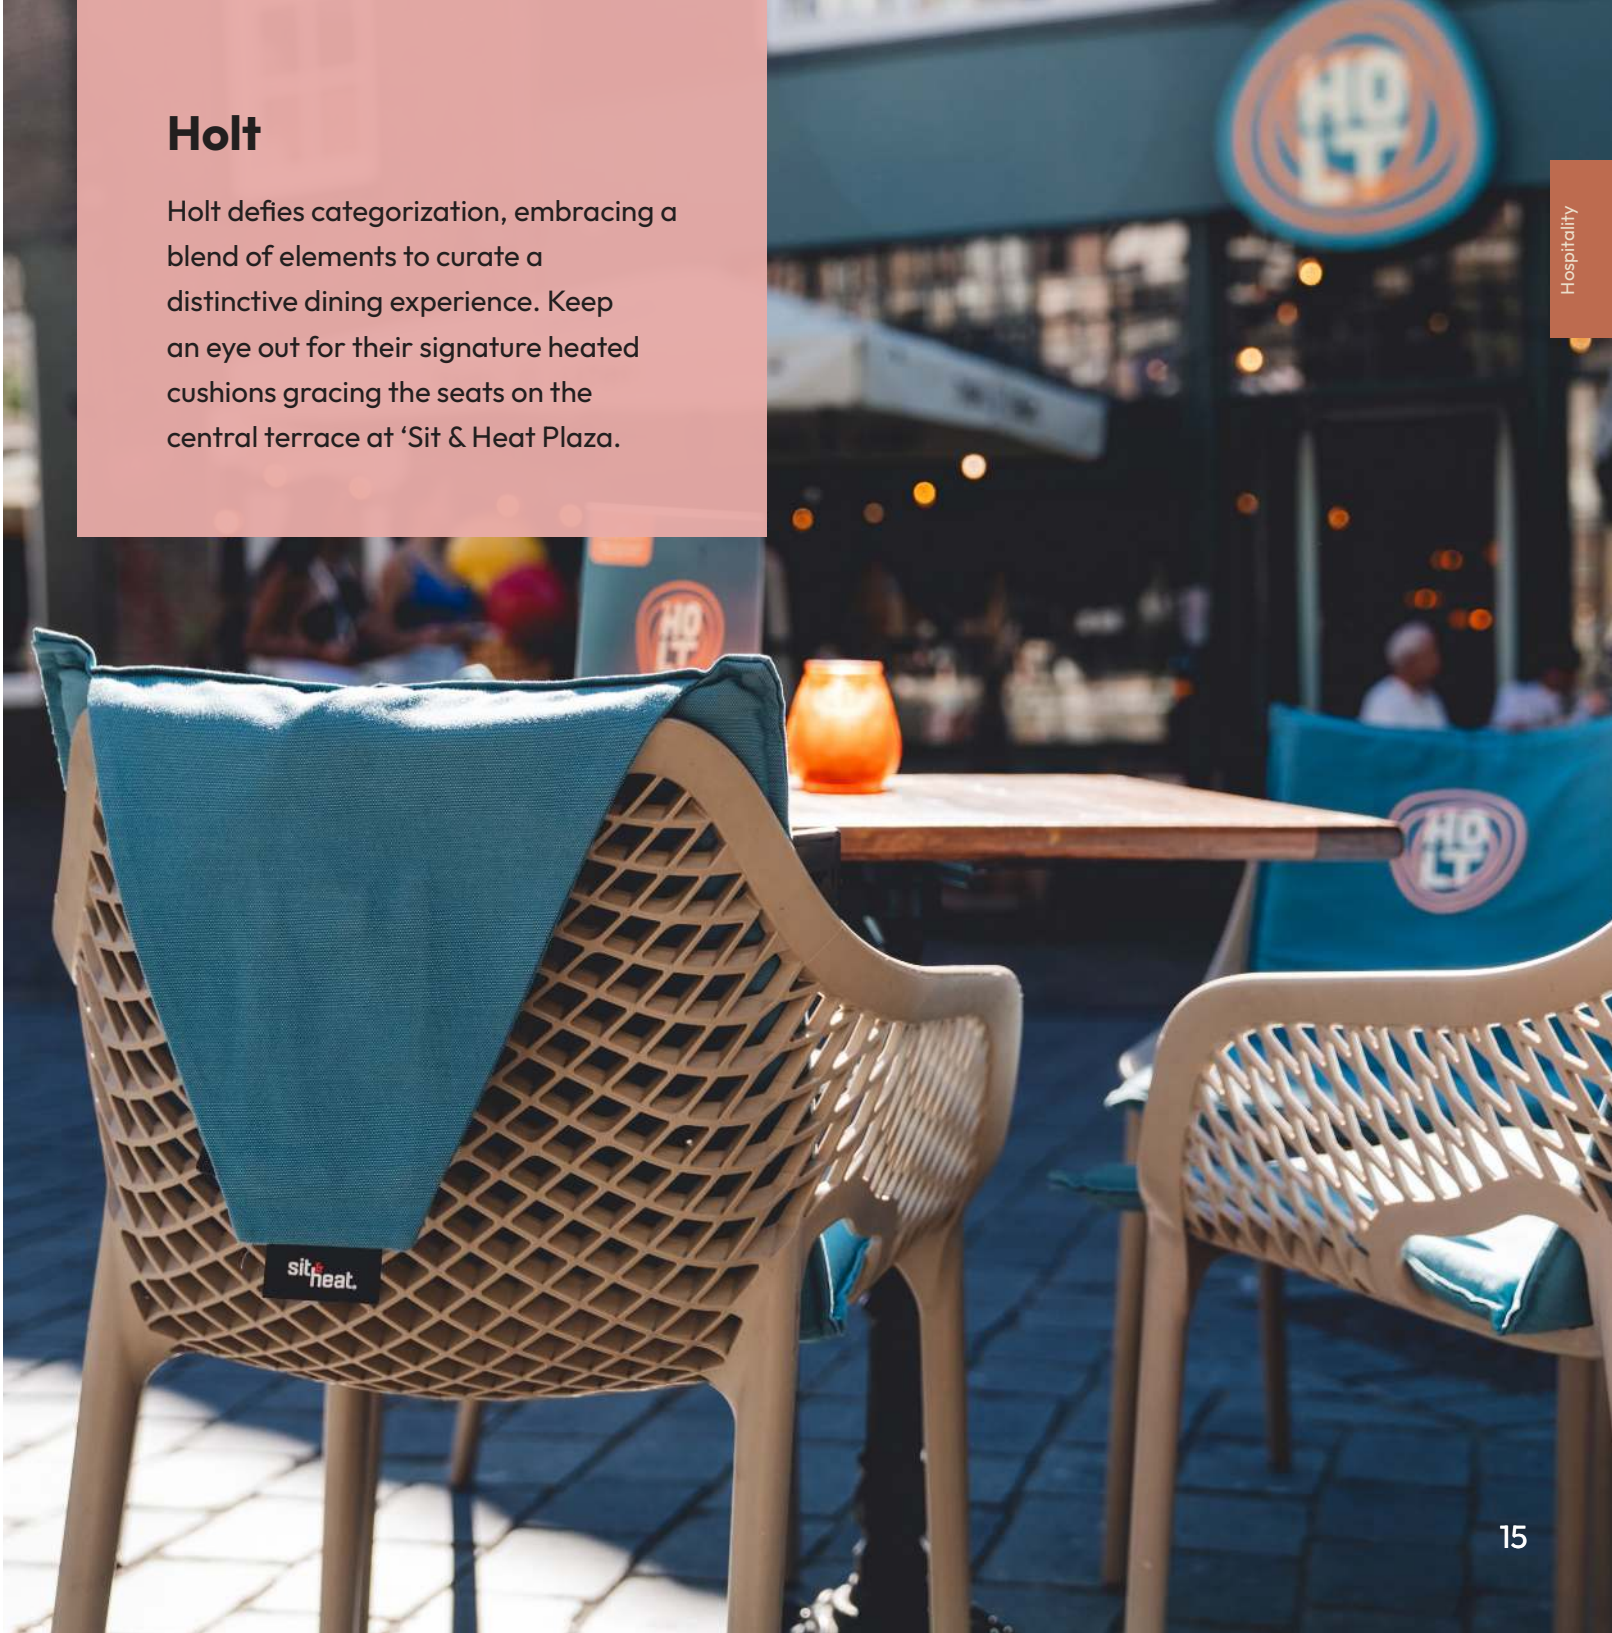

Nibbles

‘Nibbles’ restaurant, famous for its diverse international cuisine, resides at ‘Sit & Heat Plaza,’ showcasing their branded Lounge and Nimma chair cushions,
creating the ideal setting for guests to savour delicious dishes on the
warm terrace.

Holt

Holt defies categorization, embracing a blend of elements to curate a distinctive dining experience. Keep an eye out for their signature heated cushions gracing the seats on the central terrace at ‘Sit & Heat Plaza.

De Blonde Pater

“Our guest responses are fantastic. When I recently told someone indoors about the warm seats outside, she reacted, ‘You’re kidding me! Awesome!’ People definitely find that super neat and luxurious, of course.” - Nicky Maas

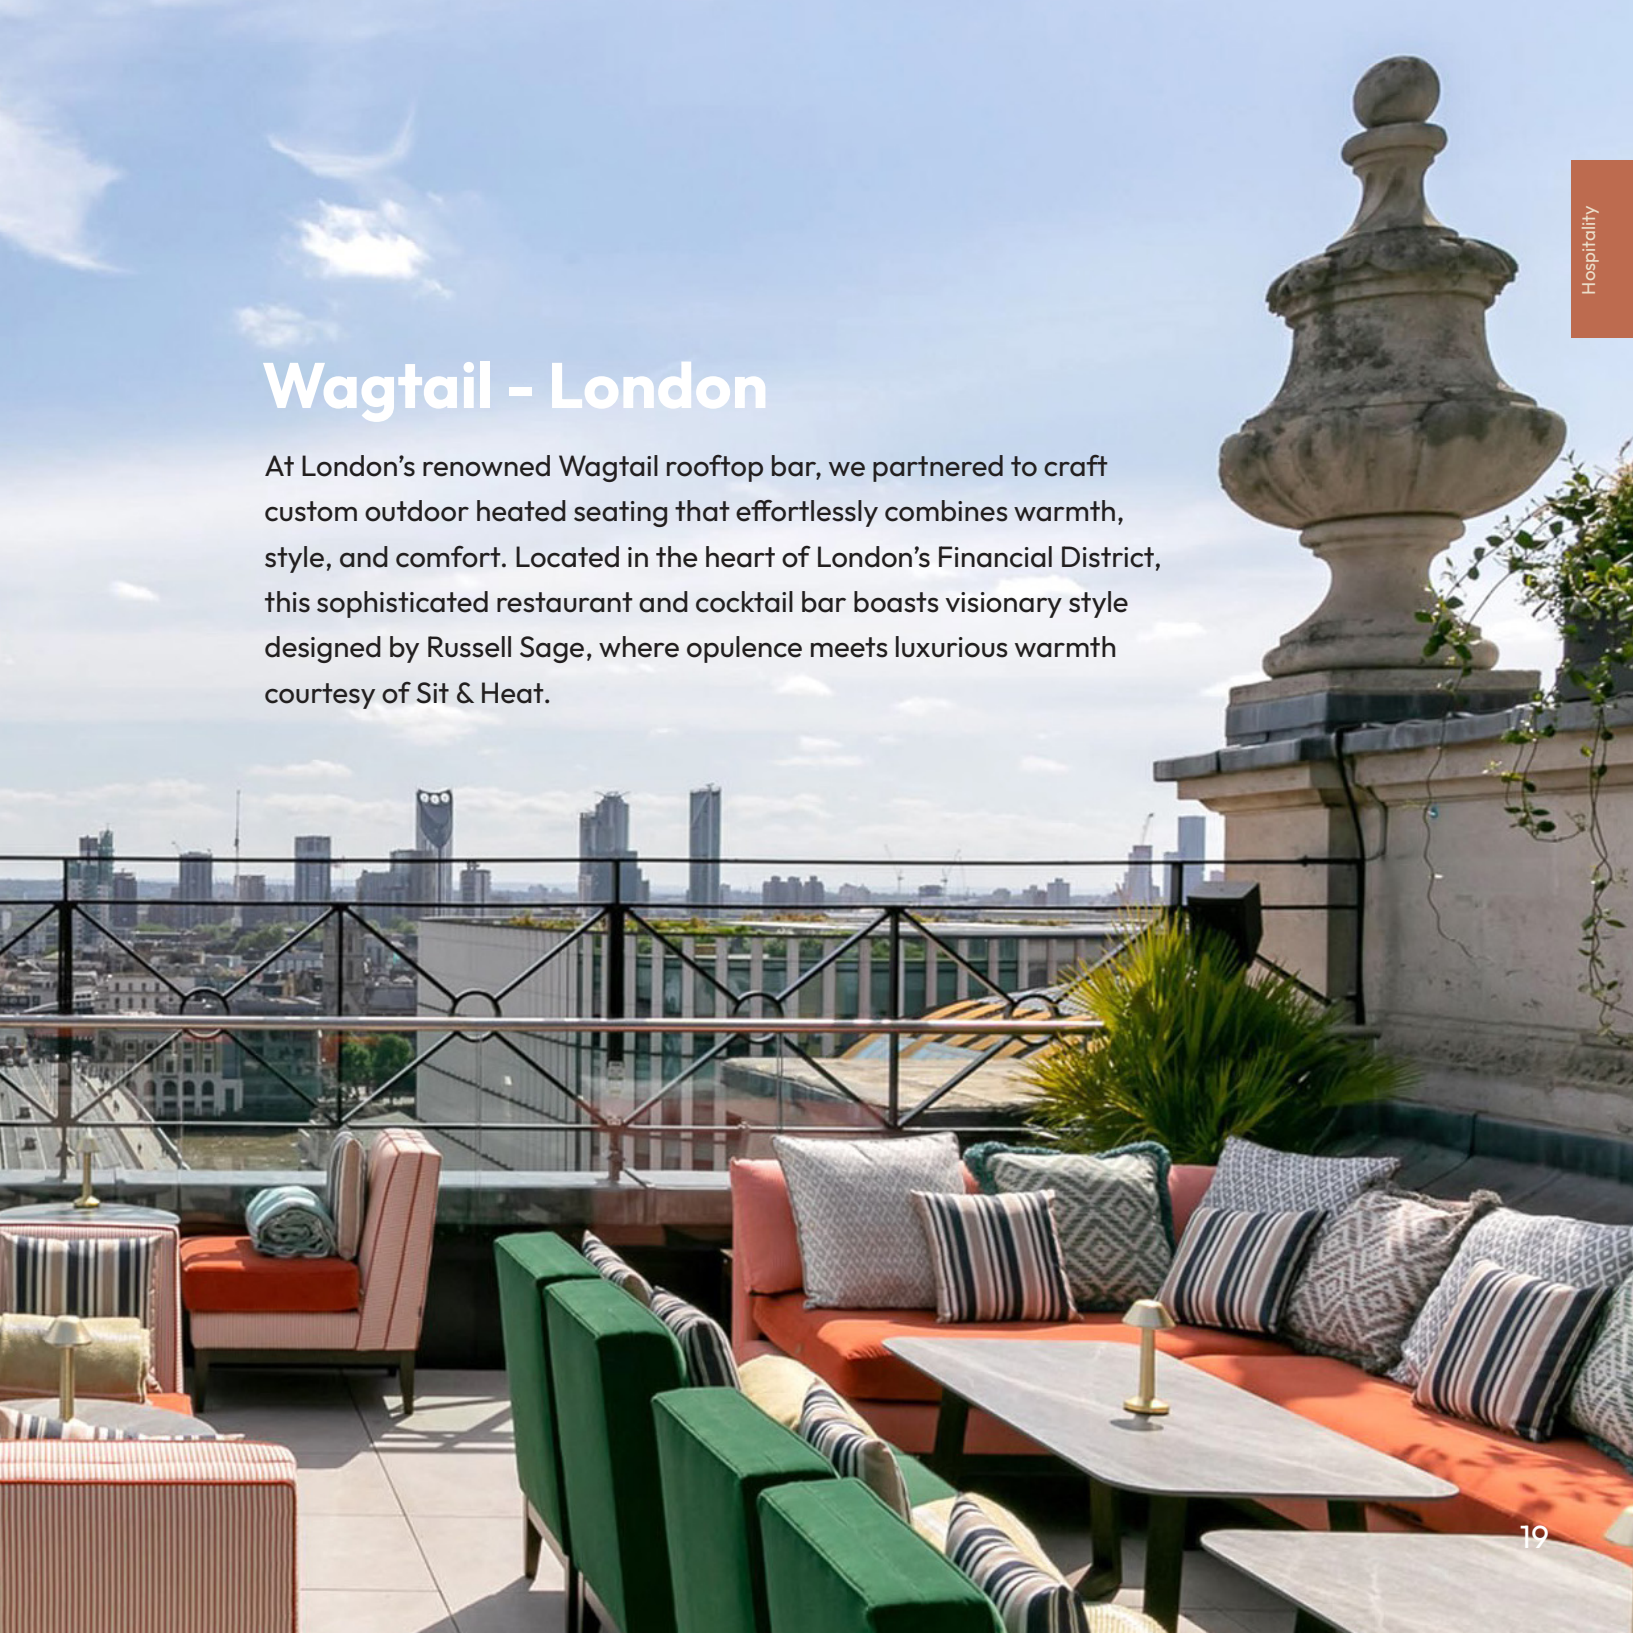

Steven

Steven' café bistro bar, founded by esteemed restaurateur Marcel, wholeheartedly joins the warm revolution at 'Sit & Heat Plaza' as its latest addition. Collaborating with us during the design phase, they've carefully selected premium fabrics that seamlessly complement the decor. Their outstanding outdoor space is already impressing guests
on the local dining scene.

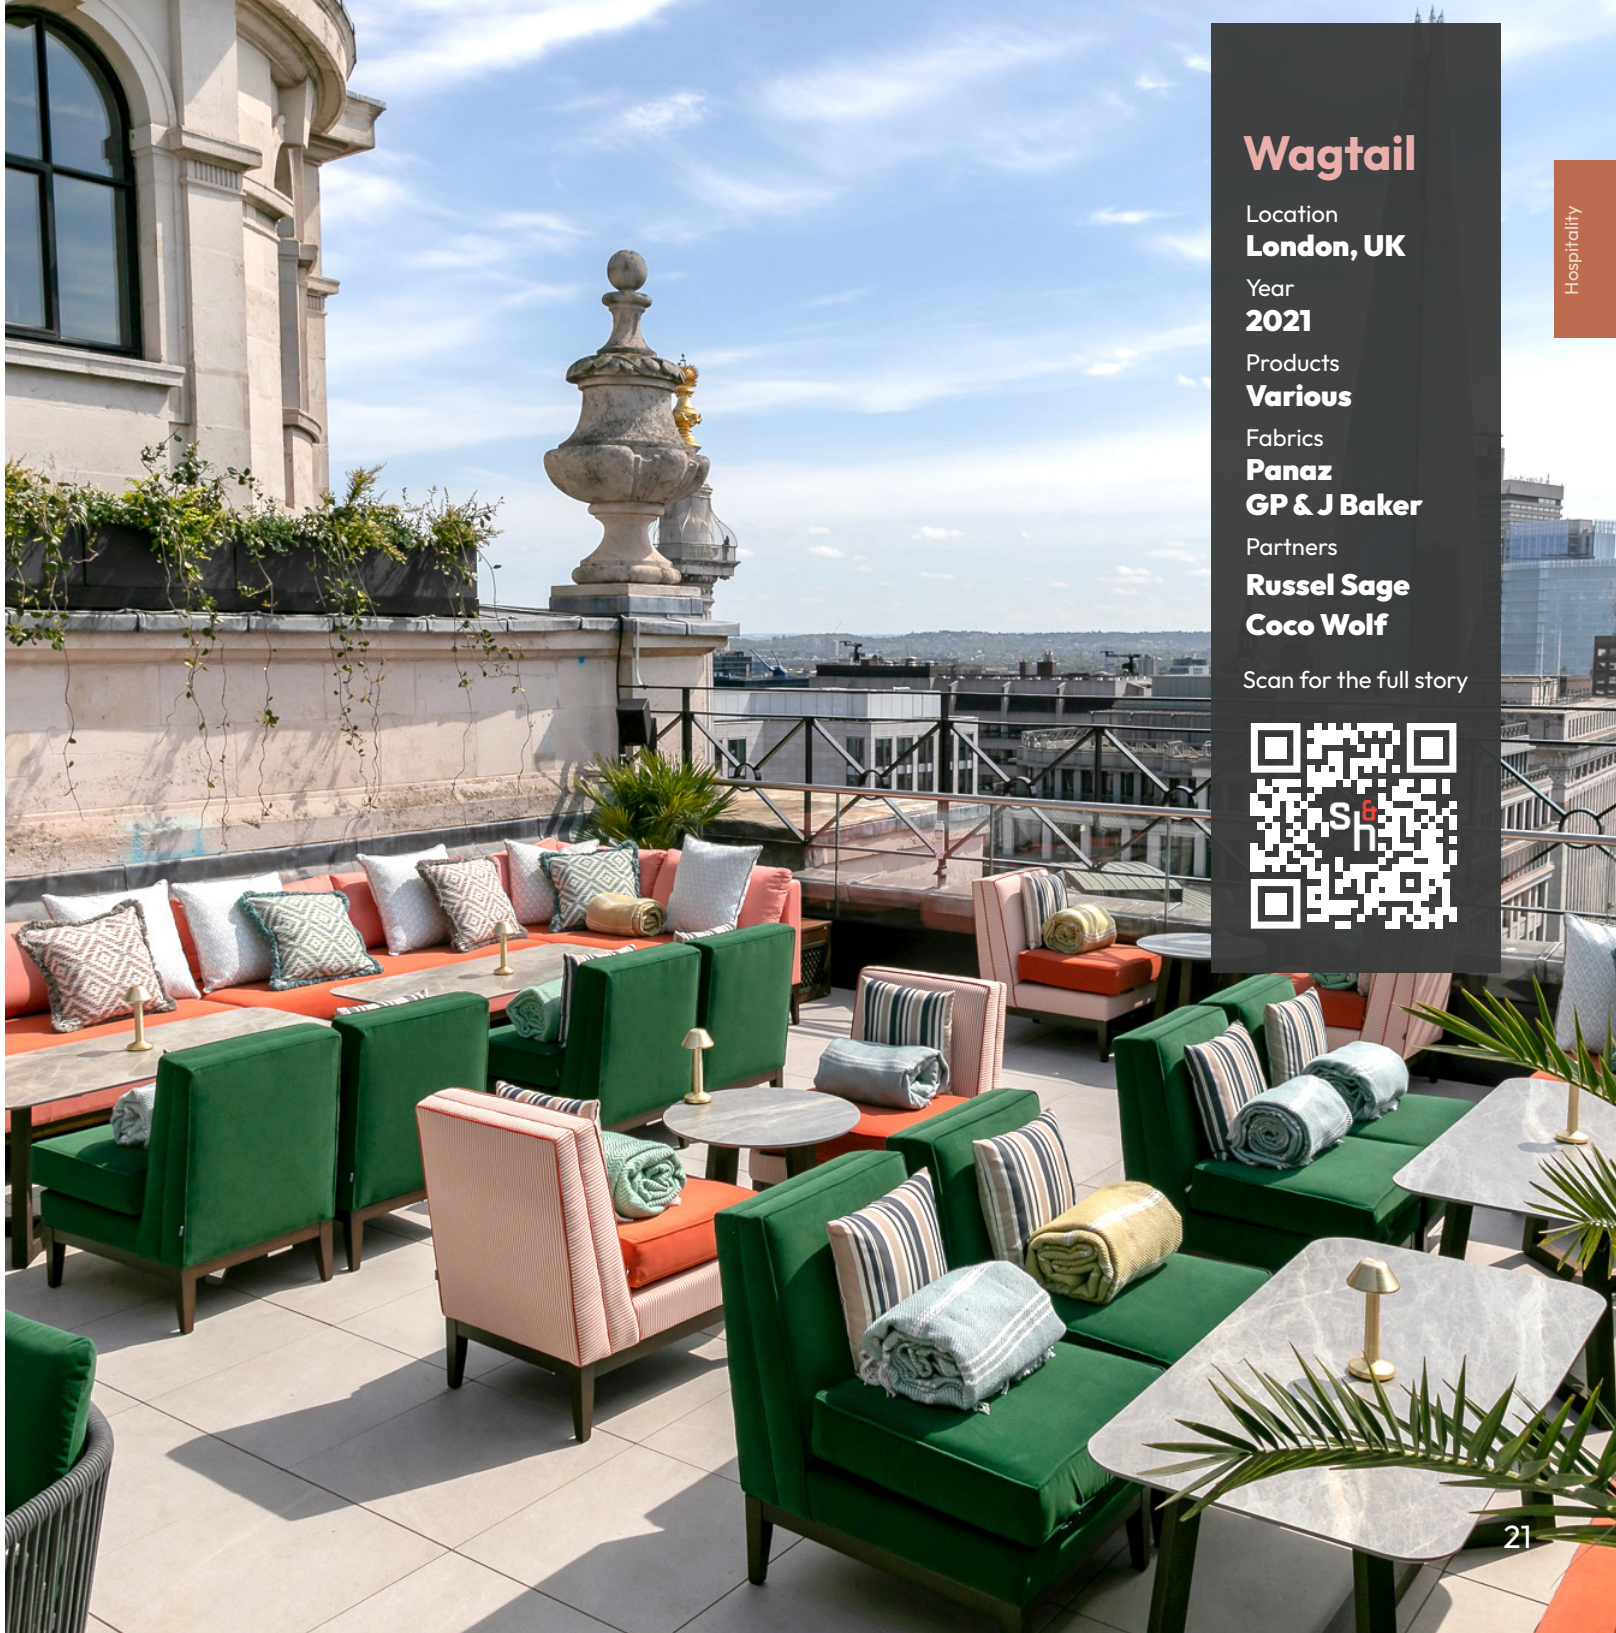

Wagtail – London

At London's renowned Wagtail rooftop bar, we partnered to craft custom outdoor heated seating that effortlessly combines warmth, style, and comfort. Located in the heart of London's Financial District, this sophisticated restaurant and cocktail bar boasts visionary style designed by Russell Sage, where opulence meets luxurious warmth courtesy of Sit & Heat.

A Warm Bum for Messi

Top footballer Lionel Messi no longer has to fear cold buttocks as of recently, whether he's on the bench before or during a match. He and the other players of the European top club Paris Saint-Germain will now be sitting on a heated seat during home matches, thanks to the Nijmegen-based company Sit & Heat.

"Absolutely awesome," says Commercial Director Jeroen Diks. "During one of the home matches, we saw Manchester City coach Joseph Guardiola sitting in our chair on TV. In another match, Messi started from the bench and you could see him on our seat. It's special to see such big names from the football world sitting on your product. This fulfills a boy's dream."

In the Paris Saint Germain dugout, the heating system is built directly into the chairs. "The consumption is a maximum of 40 Watts per seat. A heater can use up to 25,000 Watts. In a time when we're looking to reduce our reliance on gas and focusing more on sustainability, this is an alternative," says Diks.

According to Diks, it's not unusual for football players to prefer warm seats. After all, not every player is sweating on the field. "Coaches and reserve players can get quite cold on the sidelines. This is a solution."

Credit: Mitchel Suijkerbuijk, Gelderlander Newspaper

Nijmeegse Sit & Heat levert du

Warme billen voor Messi

Topvoetballer Lionel Messi en zijn teamgenoten van Paris Saint Germain zitten voortaan bij thuisduels op een verwarmde stoel van het Nijmeegse Sit & Heat.

Mitchel Suijkerbuijk

Nijmegen

Door corona zagen de ondernemers van Sit & Heat uit Nijmegen hun handel in verwarmde stoelen even instorten. Nu is het bedrijf opnieuw bezig aan een wereldwijde opmars.

Meest in het oog springend is de deal die Sit & Heat onlangs sloot met de meest succesvolle voetbalclub van Frankrijk, waarmee de stoelen in beide dug-outs verwarmd kunnen worden.

„Supergaaf", zegt commercieel directeur Jeroen Diks. „Tijdens een van de thuiswedstrijden zagen we op tv Manchester City-trainer Joseph Guardiola op onze stoel zitten. Bij een andere wedstrijd startte Messi vanaf de bank en zag je hem op onze stoel. Dat zulke grote namen uit de voetbalwereld plaatsnemen op jouw product, voelt bijzonder. Een jongensdroom komt uit."

Sit & Heat is het bekendst van de verwarmingskussens op terrasstoelen. Bijna duizend horecazaken in binnen- en buitenland gebruiken ze inmiddels. De kussens worden warm zodra iemand erop gaat zitten, zodat een energieslurpende terrasverwarmer of gasheater niet nodig is.

In de dug-out van Paris Saint Germain zit het verwarmingssysteem ingebouwd in de stoelen zelf. „Het verbruik is maximaal 40 Watt per stoel. Bij een heater gaat het om wel 25.000 Watt. In een tijd waarin we van het gas af willen en meer en meer met duurzaamheid bezig zijn, is dit dus een goed alternatief", zegt Diks.

Dat voetballers graag warm zitten, is volgens Diks niet vreemd. Niet elke speler is immers aan het zweten in het veld. „Trainers en reservespelers kunnen het langs de kant behoorlijk koud krijgen. Dit is een uitkomst."

De ondernemers van Sit & Heat, een start-up die in 2008 in Nijmegen werd opgericht door Jorg Rijkschroeff, zagen aan het begin van de coronacrisis de boel instorten. Dichte horeca, geen sportwedstrijden: even was het lastig. „We bleven positief en hadden het geluk dat mensen

Heel bijzonder als je zulke grote namen op jouw product ziet zitten

– Jeroen Diks, directeur

NY MAANDAG 14 FEBRUARI 2022

dug-outstoelen aan Europese en Nederlandse topvoetbalclubs

door corona vaker buiten wilden zitten met vrienden in plaats van binnen. Dan zijn die kussens een uitkomst. Ook ondernemers gingen zich meer op terrassen richten na de heropening van de horeca."

In de voetbalwereld is Sit & Heat geen onbekende naam. Bij Nederlandse clubs als Feyenoord en NEC hoeven supporters niet bang te zijn voor kou. „PSV zit er ook aan te komen en nog meer bijzondere opdrachten", zegt Diks. „M'n compagnon is naar New York gevlogen om een van de tofste rooftop-bars van onze kussens te voorzien. Eind maart komt er een groot project in Londen en ook de eerste offertes van Engelse clubs zijn binnen."

▲ **Jorg Rijkschroeff (links) en Jeroen Diks op de stoelen van Sit & Heat in het stadion van Paris Saint Germain.** EIGEN FOTO

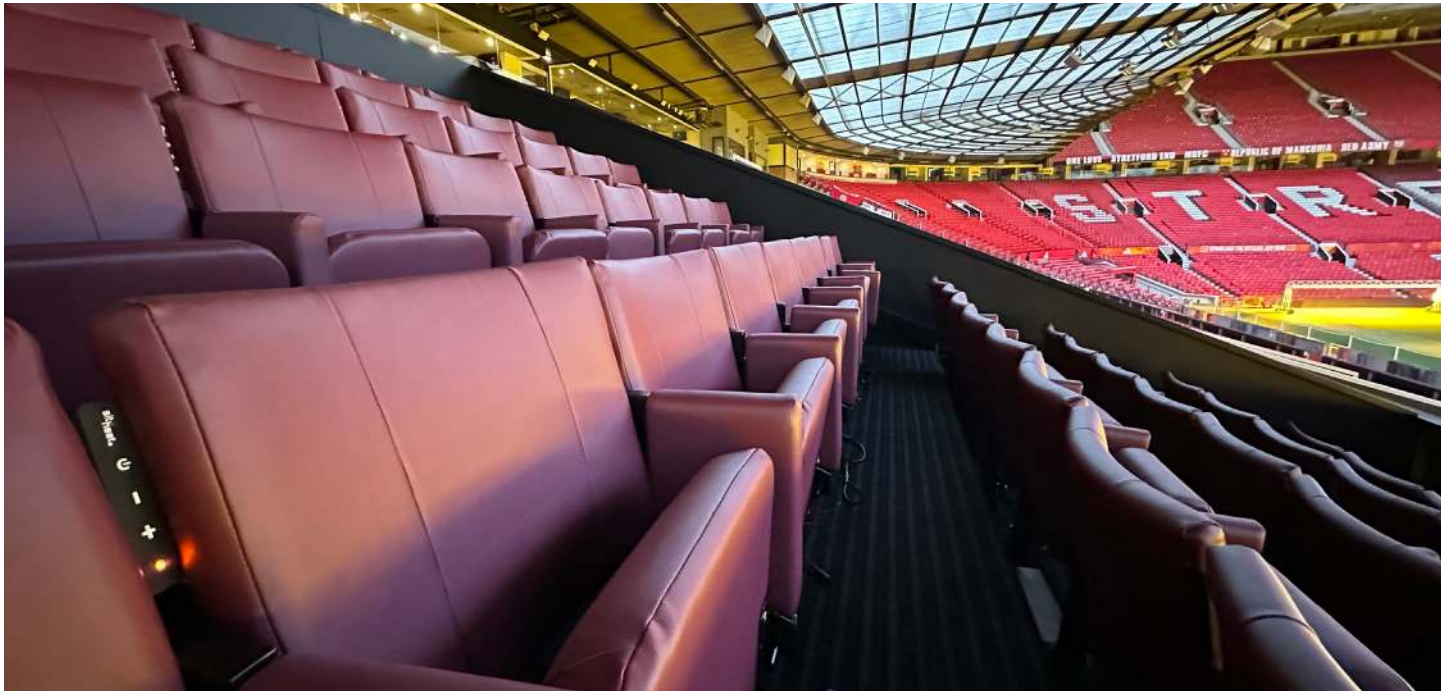

▶ **Messi in de dug-out op een kussen van Sit & Heat.** FOTO VIDEOSTILL

Nog eens twintig Nijmeegse terrassen duurzaam verwarmd

Sit & Heat zet de komende tijd ook in Nijmegen stappen: horecazaken gaan nog eens minstens twintig terrassen in de stad duurzaam verwarmen met de kussens van Sit & Heat en krijgen daarvoor subsidie van de gemeente. Zo kan de horeca langer buiten bezoekers ontvangen én energie besparen. Ondernemers kunnen maximaal 1250 euro vergoeding krijgen van de gemeente. 'Warmtecoaches' kijken samen met de horecaondernemer naar de huidige manier van terrasverwarming en het energieverbruik. Dat vergelijken zij met verwarming via Sit & Heat. De ondernemer doet vervolgens een voorstel waarna de gemeente de korting kan geven.

Church

Sit & Heat produces innovative heating products tailored for churches, offering direct warmth to attendees, reducing energy costs, and supporting net-zero sustainability goals. Our wireless heated cushions deliver personalised comfort, ensuring warmth without compromising the integrity of historic interiors. As a preferred supplier for the Church of England, we are deeply committed to providing high-quality, sustainable heating solutions for places of worship.

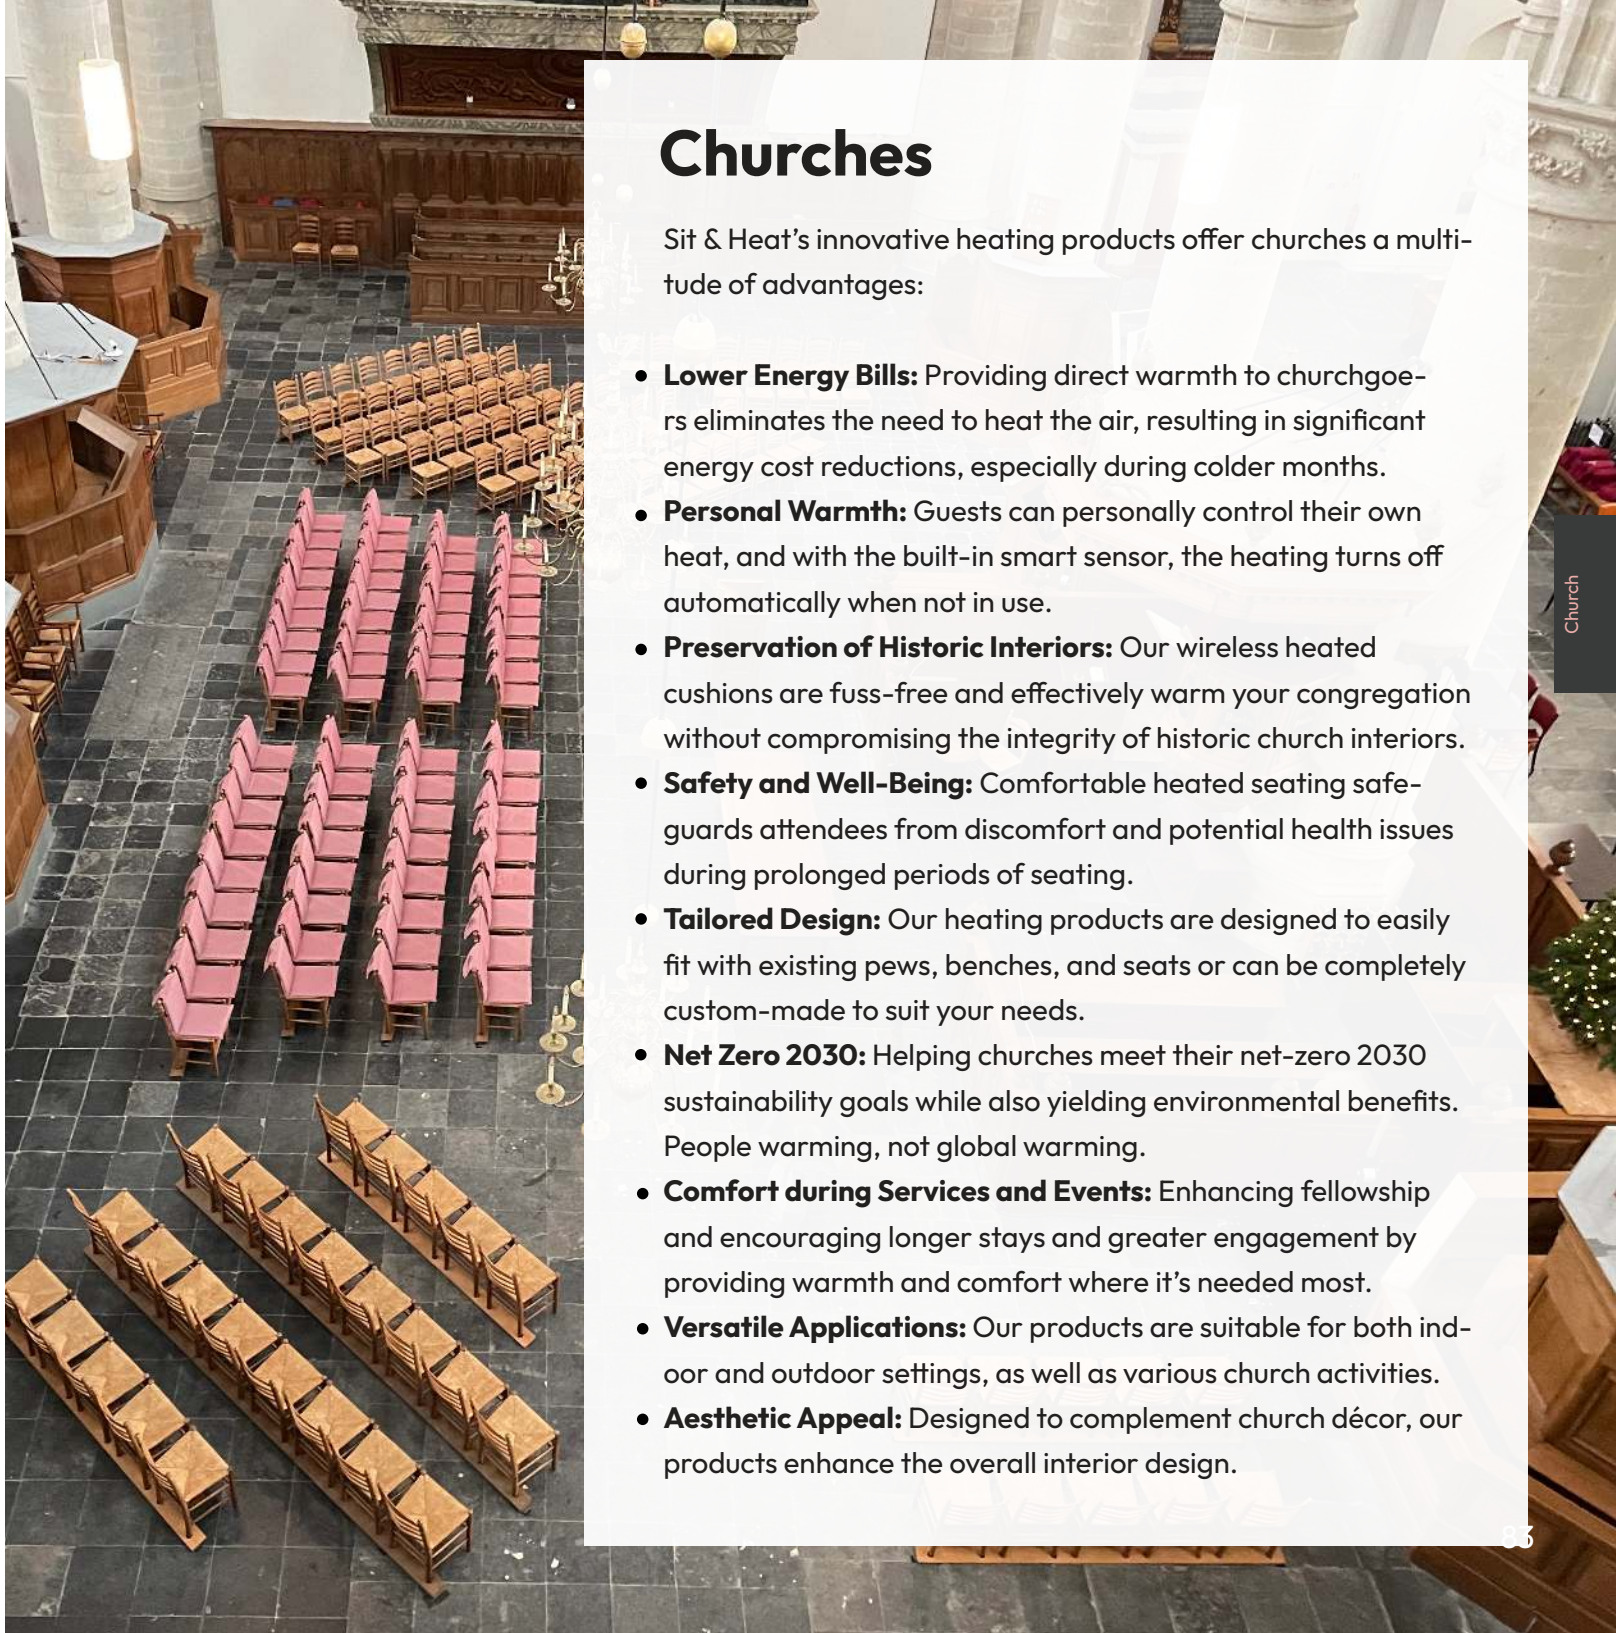

Protestantse gemeente
Brielle

Churches

Sit & Heat's innovative heating products offer churches a multitude of advantages:

- **Lower Energy Bills:** Providing direct warmth to churchgoers eliminates the need to heat the air, resulting in significant energy cost reductions, especially during colder months.
- **Personal Warmth:** Guests can personally control their own heat, and with the built-in smart sensor, the heating turns off automatically when not in use.
- **Preservation of Historic Interiors:** Our wireless heated cushions are fuss-free and effectively warm your congregation without compromising the integrity of historic church interiors.
- **Safety and Well-Being:** Comfortable heated seating safeguards attendees from discomfort and potential health issues during prolonged periods of seating.
- **Tailored Design:** Our heating products are designed to easily fit with existing pews, benches, and seats or can be completely custom-made to suit your needs.
- **Net Zero 2030:** Helping churches meet their net-zero 2030 sustainability goals while also yielding environmental benefits. People warming, not global warming.
- **Comfort during Services and Events:** Enhancing fellowship and encouraging longer stays and greater engagement by providing warmth and comfort where it's needed most.
- **Versatile Applications:** Our products are suitable for both indoor and outdoor settings, as well as various church activities.
- **Aesthetic Appeal:** Designed to complement church décor, our products enhance the overall interior design.

Our vision

At Sit & Heat, our goal is to change heating for good. We're transforming how people experience warmth, offering on-the-spot heating wherever they want it. Our mission is about redefining comfort and setting new standards in heating efficiency. Committed to disrupting traditional heating methods, we focus on providing direct, personalised warmth that's both energy-saving and environmentally conscious. With every project, we strive to deliver customizable, innovative heating solutions that are better for both people and the planet.

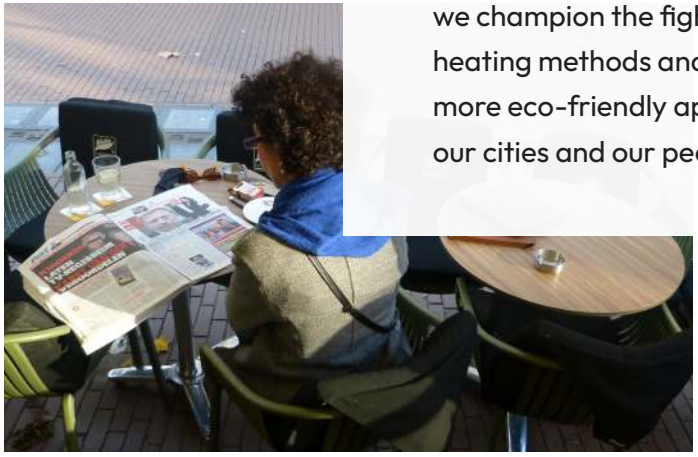

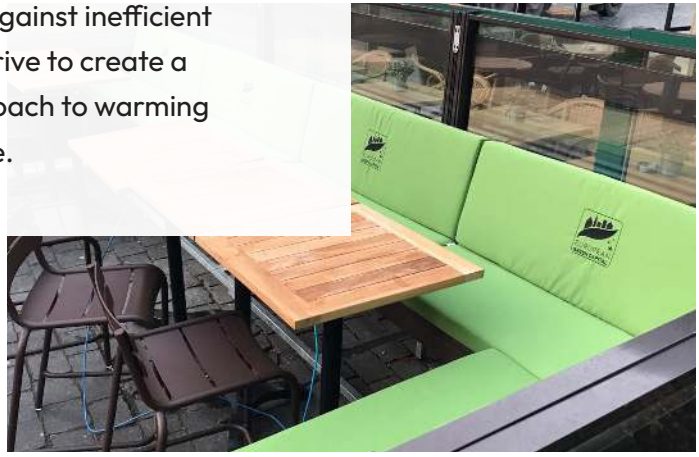

From Climate Plan to Climate Action

At Sit & Heat, we foster close collaborations with governments, cities, and local councils, working hand in hand to bring their climate plans to climate action, by simplify the transition from emissions-intensive heating systems to our innovative solutions. Through our ongoing partnerships, we offer easier access to sustainable heating, within the Netherlands and internationally. Through this work we're contributing to the development of 'NetZero cities' across Europe, helping to meet emissions reduction targets and create smart cities of the future. Together, we champion the fight against inefficient heating methods and strive to create a more eco-friendly approach to warming our cities and our people.

Making it Local

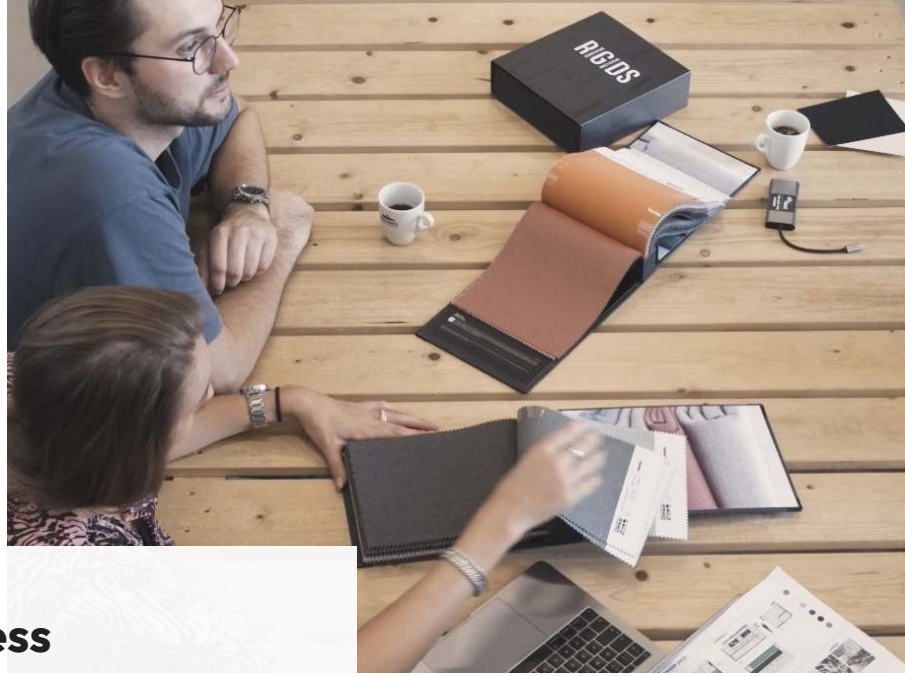

At Sit & Heat, we prioritize local manufacturing for the benefit of our customers and the environment. We collaborate closely with production facilities worldwide, making every effort to produce our products as locally as possible. This reduces carbon emissions and ensures minimal transportation impact, so our products reach our valued consumers efficiently. Our commitment to localized manufacturing reflects our dedication to our clients and our ethical responsibilities.

Beyond Business

Our social mission is more than just a corporate initiative; it's who we are and what unites us as a close-knit family. Our collective aim is to revolutionize the way people experience warmth, making it more accessible and sustainable for all. Within this family, each of us carries unique stories and perspectives that exemplify the passion that fuels our mission.

Celsius

Heat your seat, not the planet, with Celsius: the future of terrace seating. Developed through a partnership that combines Satelliet's expertise in hospitality furniture with Sit & Heat's advanced outdoor heating technology, this award-winning product is a stylish terrace chair equipped with integrated heating, making outdoor hospitality accessible 365 days a year.

Change the Way you Experience Warmth

Sit & Heat designs energy-efficient heating products for personalised comfort and sustainability. Our collection features heated seats, pads, and cushions, available in both cordless, rechargeable, and fixed-wired models.

We emphasise customisation, allowing hospitality owners, architects, and designers to tailor products to their specific projects, offering choices in power, size, logos, colours, and fabrics for truly personalised warmth. This versatility makes our heating products a favourite among professionals seeking to provide the warmest hospitality.

Trusted by iconic venues like Manchester United and PSG, as well as a global array of restaurants and bars, Sit & Heat is the go-to for stylish outdoor seated heating and comfort for guests.
