

What is Sit & Heat?

Sit & Heat is energy-efficient terrace heating built into a cushion. Available in wired and battery-powered versions, it saves 95% on energy costs while keeping your guests comfortably warm.

The heating starts when you sit down. Use the control button to choose your preferred warmth. When you leave your seat, the heating switches off automatically after two minutes. Heating in both the seat and backrest warms your torso for all-round comfort.

Café Top 100 People's Choice Award winner

Gijs Schapendonk | Proeflokaal Goesting - Venray

"It is a serious investment, but once the cushions are on the terrace, my guests love them and the investment pays for itself!"

More revenue

Sit & Heat gives your guests lasting warmth and comfort. They stay longer and are more likely to order another drink. It also creates extra seating capacity by making your outdoor space usable in winter.

Planet-friendly

Save up to 95% on energy with Sit & Heat. The sensor switches the heating on and off automatically, so energy is not wasted warming the outdoor air. No unnecessary energy use!

Social workshop

Made in our own social workshop in the Netherlands by skilled craftspeople from refugee backgrounds. We combine local craftsmanship with social commitment, giving your choice of comfort a positive story.

Chair cushions

Nimma
Our versatile standard model: comfortable and ready to use. Also available in custom dimensions for a perfect fit.

Cannes
A timeless model with maximum flexibility. We can tailor a cushion to almost any chair, matching its shape and use.

Munich
Designed for seat-only heating, Munich offers cosy comfort in a simple cushion. Available in various sizes for the right fit.

Powerplus M
Ideal for seat-only heating, with 5-12 hours of use, or seat and back heating, with 5-7 hours of use.

Powerplus L
Long-lasting comfort: 7-16 hours with seat-only heating and 5-10 hours with seat and back heating. Ideal for intensive professional use.

Charging Crate
An efficient charging solution for hospitality. Charge 12 batteries at once by docking them, without loose cables. Stackable and linkable, the crates keep everyday charging organised and professional.

Bench cushions

Lounge
Bench cushions with heated seats and backrests for lasting, even warmth. Ideal for keeping guests comfortable for longer.

Lounge Bottom
Bench cushions with seat-only heating: a simple, efficient and comfortable solution for a range of layouts.

300W Transformer
Powers up to 7 Lounge seats or 12 Lounge Bottom seats. Powerful and reliable for larger installations.

150W Transformer
Powers up to 4 Lounge seats or 8 Lounge Bottom seats. A compact, efficient solution for smaller installations.

Fabrics & colours
We use durable, high-quality fabrics in a wide range of colours for intensive professional use. Agora fabrics are standard, with an extensive colour palette. Customers can also supply their own fabric.

Embroidery
Optional embroidery lets you personalise cushions with a logo or text, matching the character and branding of your venue.

Extension cable
Connect cushions and link seats with ease, giving you more freedom to arrange your seating.

Save energy and money

With Sit & Heat, you save both energy and money. Warmth is delivered directly to your guests through their seats, significantly reducing energy use compared with a gas or electric terrace heater.

Gas heater
Power
12,000 watts
Cost per hour
€4.30

Electric heater
Power
1,500 watts
Cost per hour
€1.50

Sit & Heat
Power
40 watts
Cost per hour
€0.01
